

# PRODUCT Spotlight

**Freedom, at last!**

Algood's recently released Freedom™ wheel lives up to its name in every way. It is rust free, maintenance free and hassle free. And with its ease of maneuverability it provides unparalleled freedom of movement.

Freedom is a Moldon Urethane wheel with an aluminum core, crowned tread and capacities of 700-1200lbs. It is non-marking with debris-rejecting tread, allowing for an easy, smooth and quiet ride. Freedom provides maximum floor protection while carrying light or heavy weight loads and offers a high degree of resistance to shock and vibration. It can be used indoors or outdoors, in moist environments and is ideal for towlines, platform and stock trucks, as well as factory applications. Freedom's great longevity and its ability to prolong the life of the equipment make it an amazingly cost effective choice.

### **Beauty and Brawn**

Freedom™ comes in diameters ranging from 4" to 8" and can be used in almost all Algood casters. With its brilliant blue finish, Freedom has both beauty and brawn. Pictured to the left is the Freedom wheel in the versatile Algood EMaxx™ caster with a yellow chromate finish.
